TARGET ORGANS AFFECTED

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

EFFECTS OF OVEREXPOSURE

SKIN CONTACT: Excessive exposure causes irritation. **EYE CONTACT:** Causes redness,

itching or burning sensation. INHALATION: Excessive exposure may cause headache, dizziness, nausea, and loss of coordination. Extreme overexposure may result in unconsciousness and possibly death.

4. First Aid Information

EMERGENCY AND FIRST AID PROCEDURES

SKIN CONTACT: Wash thoroughly with soap and water. Remove contaminated clothing and laundry before reuse. EYE CONTACT: Immediately flush with water for 15 minutes. Get medical attention. SPECIAL FIREFIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, fog nozzles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

UNUSUAL FIRE AND EXPLOSION HAZARDS

Isolate from heat, electrical equipment, sparks and open flame. Containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency conditions, overexposure may not be immediately apparent. Obtain medical attention.
